

MAJOR AND COMPLEX LOSS

Construction, engineering, power and natural resources

When it comes to managing losses involving construction and engineering, businesses and insurers need **adjusters with technical knowledge and industry expertise.**

We have a dedicated team that specialises in these complex losses. From claims involving small refrigeration plants to large iconic buildings around the world, our construction and engineering specialists can help.

Expert support

Our loss adjusters have extensive experience managing major and complex losses and offer technical expertise for insurers, captives, reinsurers and corporate clients. Many of our team are Chartered Loss Adjusters, and have the strength and stability to serve as an independent resource on many types of construction and engineering claims. We provide expert services and work closely with liability adjusters and forensic accountants to deliver a comprehensive solution.

Strength in numbers

16

construction and
engineering adjusters

Unparalleled experience

Our adjusters have managed claims for clients in various industries including:

- High-rise and low-rise commercial and residential construction
- Mining (coal and hard rock, open-cut, underground) and quarrying
- Renewables (wind, solar, geothermal and hydro)
- Power and energy (coal and gas)
- Agriculture, farming, forestry and sugar
- Information technology and security
- Aviation infrastructure and airports
- Engineering, metal fabrication and foundries
- Oil refineries, fuel storage, pumping and dispensing infrastructure
- Air conditioning, refrigeration and HVAC plants
- Mobile plants and machinery and mining equipment
- Piling/shoring collapses
- Bridges, roads, pavements, tunnels and railways
- Building defects and historic buildings
- Manufacturing and production plants
- Hospitals, medical, dental, imaging, laboratories and research facilities
- Port services, public utilities and pipelines
- Recycling and waste processing plants
- Offshore installations and subsea equipment
